DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 5-12, drawn to A Non Ionic Catalyst for the Polymerization of Olefins, classified in class 502, subclass 103.
- II. Claims 13-24, 33-40, drawn to An Ionic Complex Catalyst for the Polymerization of Olefins, classified in class 502, subclass 103.
- III. Claims 4 and 25-32, drawn to A Non Ionic Catalyst for the Polymerization of Olefins Using Additional Compounds, classified in class 502, subclass 103.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, inventions I, II and III use different complexes to form the catalyst. Group I uses a non ionic oxygen containing compound. Group II uses an ionic complexing agent. Group III uses an additional complex not disclosed in I or II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1-3, 5-12 are generic to a plurality of disclosed patentably distinct species comprising I-1 to I-6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Claims 4, 25-32 are generic to a plurality of disclosed patentably distinct species comprising I-1 to I-6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Claims 13-15, 17-24 and 16, 33-40 are generic to a plurality of disclosed patentably distinct species comprising I-1 to I-6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Daniel Pereira on 06/17/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1755

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
